MADE BY: _____

# My picture sequence

Choose one party job. Arrange three picture cards. Your partner follows them from left to right.

**Our goal:** Draw what you want the machine to make.

_____

**1** FIRST

Arrange or draw your first picture.

**2** NEXT →

Arrange or draw your next picture.

**3** LAST →

Arrange or draw your last picture.

My partner followed every card: □
We swapped roles: □

Our result matched our goal: □ Yes □ Try again
Circle the first picture you want to change.

**Predict → Run → Look → Change → Run again.**
Use pretend actions and paper props. Test before gluing. Decorate after your sequence works.

Tell a friend: “My sequence tells the computer what comes first, next and last.” Can you explain what changed when you swapped two cards?

# Five little machines. Your sequence.

The cards below are mixed up. Cut out one row. Arrange it on your sequence strip.

| | | | |
|---|---|---|---|
| **Pumpkin face** | Stamp face | Show pumpkin | Put pumpkin |
| **Invitation** | Fold card | Post card | Stamp star |
| **Treat bag** | Tie bow | Open bag | Add sweets |
| **Lantern** | Add cover | Light on | Put light |
| **Balloon** | Hang balloon | Tie balloon | Pump air |

Teacher: explain each picture aloud. The invitation’s star goes inside the open card. The lantern loading slot is blocked by the cover. For the lantern, two different sequences can work. Do not give a numbered answer strip.
